Nairobi, Kenya.

Professional Summary

Proactive IT professional with extensive experience in managing IT service requests and incidents, network administration, and system security. Skilled in diagnosing and resolving complicated technical issues, optimizing networking infrastructure, and doing preventative and corrective maintenance to reduce downtime. Excellent track record of maintaining compliance with ICT policies while providing dependable technical support. Experienced in installing and configuring ICT equipment, monitoring backup systems, and implementing solutions to ensure business continuity. Capable of analyzing, evaluating, and deploying computer programs while ensuring data integrity, authentication, and security standards.

Technical skills:

- Microsoft Office Suite Proficiency: Extensive experience using Microsoft Word, Excel, Outlook, and other Office tools to support administrative and reporting functions.
- Operating systems: Windows, Linux and MacOS.
- Programming languages: Java, Python, JavaScript, PHP and HTML.
- Databases: MySQL.
- Tools: ServiceNow ITSM, Wireshark, packet tracer, Remote Desktop(RDP), TeamViewer, AnyDesk, Zendesk ITSM and Jira Service management.
- IT support & troubleshooting: Adept at diagnosing and resolving hardware, software, ERP systems(SAP) and network issues to ensure smooth and uninterrupted operations.
- Network configuration: Experience in setting up, Ethernet cable crimping, fibre optic cable splicing configuring, and maintaining LANs, routers, switches, and wireless networks, ensuring optimal uptime and performance.
- Data Analysis**:** Advanced Microsoft Excel and Python.
- System security: Proficient in implementing endpoint security measures, monitoring antivirus software, and supporting compliance with organizational security policies.
- Hardware deployment & maintenance: Skilled in the installation, configuration, and repair of IT equipment including workstations, printers, projectors, CCTV, and biometric devices.
- Backup & recovery management: Competent in executing structured data backup strategies to safeguard organizational information and support business continuity.

Soft skills:

- Problem-solving: Creative and analytical approach to challenges.
- Adaptability: Quick to learn and adjust to new tools and processes.
- Collaboration: Strong team player across diverse groups.
- Communication: Clear in both technical and non-technical contexts.
- Attention to Detail: Precision in analysis and tasks.

Professional Experience

Kenya Revenue Authority, Embu - IT Support Officer (Feb 2025 – March 2026)

- Diagnosed and resolved hardware, software, and network-related issues by identifying root causes and implementing sustainable solutions.
